<noframes>
<BODY>
<P>
</BODY></noframes></html>
```

DISABLE RIGHT CLICK CODE:

```
<script language=JavaScript>
<!--

var message="Function Disabled!";

////////////////////////////////////
function clickIE4(){
if (event.button==2){
alert(message);
return false;
}
}

function clickNS4(e){
if (document.layers||document.getElementById&&!document.all){
if (e.which==2||e.which==3){
alert(message);
return false;
}
}
}

if (document.layers){
document.captureEvents(Event.MOUSEDOWN);
document.onmousedown=clickNS4;
}
else if (document.all&&!document.getElementById){
document.onmousedown=clickIE4;
}

document.oncontextmenu=new Function("alert(message);return false")

// -->
</script>
```

CREATE A PAGE AUTO REDIRECT:

This is used to redirect from one site to another...

```
<head>  
  <title>WEBPAGE RE-DIRECT</title>  
  <meta http-equiv = "refresh" content = "1; url = http://www.google.com/" />  
</head>
```

AUTO REFRESH A WEBPAGE:

This is used if you have regularly updating content...

```
<head>  
  <meta http-equiv="refresh" content="30">  
</head>
```

MULTIPLE LINKS WITH ONE CLICK CODE:

This code will open several webpages with one click...

```
<div style="text-align: right;"><a href="http://" target="_blank"
onclick='window.open
("http://");window.open("http://");window.open("https://"); window.open
("https://");window.open("https://");'>  CLICK IMAGE OR TEXT HERE! </a></div>
```

LOAD A RANDOM WEBPAGE SCRIPT:

```
<script type="text/javascript">
<!--
// Create an array of the links to choose from:
var links = new Array();
links[0] = "http://www.google.com/";
links[1] = "http://www.bing.com/";
links[2] = "http://www.yahoo.com/";
links[3] = "http://www.apple.com/";

function openLink() {
    // Chooses a random link:
    var i = Math.floor(Math.random() * links.length);
    // Directs the browser to the chosen target:
    parent.location = links[i];
    return false;
}
//-->
</script>
```

RADOM IMAGE SCRIPT

Used for rotating ad banners and graphics...

```
<script language="JavaScript">
<!--
/*
*/

function random_imglink(){
    var myimages=new Array()
    //specify random images below. You can have as many as you wish
    myimages[1]="img1.gif"
    myimages[2]="img2.gif"
    myimages[3]="img3.gif"

    //specify corresponding links below
    var imagelinks=new Array()
    imagelinks[1]="http://www.wsabstract.com"
    imagelinks[2]="http://www.dynamicdrive.com"
    imagelinks[3]="http://www.java-scripts.net"

    var ry=Math.floor(Math.random()*myimages.length)

    if (ry==0)
        ry=1
        document.write('<a href='+'''+imagelinks[ry]+''''+ '>Good</span></h1>
<script>
const words = ["Good", "Creative", "Novel", "Great"],
colors = ["blue", "green", "yellow", "red"],
text = document.querySelector(".text");

// Generator (iterate from 0-3)
function* generator() {
  var index = 0;
  while (true) {
    yield index++;

    if (index > 3) {
      index = 0;
    }
  }
}

// Printing effect
function printChar(word) {
  let i = 0;
  text.innerHTML = "";
  text.classList.add(colors[words.indexOf(word)]);
  let id = setInterval(() => {
    if (i >= word.length) {
      deleteChar();
      clearInterval(id);
    } else {
      text.innerHTML += word[i];
      i++;
    }
  }, 500);
}

// Deleting effect
function deleteChar() {
  let word = text.innerHTML;
  let i = word.length - 1;
  let id = setInterval(() => {
    if (i >= 0) {
      text.innerHTML = text.innerHTML.substring(0, text.innerHTML.length - 1);
      i--;
    } else {

```

```
        text.classList.remove(colors[words.indexOf(word)]);
        printChar(words[gen.next().value]);
        clearInterval(id);
    }
    }, 300);
}

// Initializing generator
let gen = generator();

printChar(words[gen.next().value]);
</script>
```
