

A CHRONOLOGICAL OUTLINE OF ANCIENT ALIEN VISITATIONS

>AROUND 200,000 YEARS AGO: The Anunnaki, an extraterrestrial race, arrives on Earth and begins the genetic manipulation of early Homo sapiens to create modern humans. This is based on the Sumerian texts that mention the Anunnaki and their role in human development.

>APPROXIMATELY 45,000 YEARS AGO: Ancient Astronauts visit Australia, as evidenced by the Aboriginal oral traditions and cave paintings that depict beings wearing helmets and carrying advanced technology.

>AROUND 17,000 TO 15,000 YEARS AGO: The ancient civilization of Atlantis exists, and its people have advanced technology and knowledge given by extraterrestrial visitors. The destruction of Atlantis is linked to a celestial event or the misuse of advanced technology.

>APPROXIMATELY 12,000 YEARS AGO: Göbekli Tepe, the oldest known temple, is built in modern-day Turkey. Its highly advanced architectural design and the presence of astronomical alignments suggest the influence of Ancient Astronauts.

>AROUND 6,000 YEARS AGO: The Sumerian civilization emerges in Mesopotamia, with its advanced knowledge of astronomy, mathematics, and engineering. The Sumerian texts contain accounts of the Anunnaki and their involvement in human affairs.

>2500 - 1500 BCE: The construction of the Great Pyramids of Egypt, which are aligned with the stars of Orion's Belt. Their precise engineering and astronomical alignments suggest the involvement of Ancient Astronauts.

>1500 - 1000 BCE: The ancient Indian texts known as the Vedas describe vimanas, flying machines powered by advanced technology, which are interpreted by some as evidence of extraterrestrial visitation.

>Approximately 600 BCE: The Nazca Lines in Peru are created, featuring large-scale geoglyphs that can only be fully appreciated from a high altitude, suggesting the presence of advanced aerial technology.
